

Course Design Template – Carousel Lessons

Using the NEW Adobe Captivate

Using templates when creating eLearning courses offers significant benefits by streamlining the development process and ensuring a consistent, professional design across all modules. Templates provide a ready-made framework for layout, navigation, and branding elements, allowing instructional designers to focus on content quality rather than repetitive formatting tasks. This consistency enhances the learner experience by providing intuitive navigation and a cohesive visual style that reinforces brand identity. Additionally, using templates increases production efficiency, reduces errors, and simplifies updates or scalability for future courses—ultimately saving time and resources while maintaining high-quality learning standards.

Using the Adobe Captivate Carousel widget as the core presentation method for modular lesson development offers a dynamic and engaging way to organize and deliver content. The carousel format allows learners to navigate through distinct lesson modules intuitively, promoting self-paced learning and easy review of key topics. This interactive approach enhances learner engagement by breaking complex information into manageable, visually appealing sections. Additionally, the carousel widget supports a clean, consistent design structure that aligns with modern eLearning best practices, making it ideal for presenting multimedia content such as text, images, and video in a cohesive, interactive layout. By leveraging this tool, instructional designers can create streamlined, modular lessons that are both efficient to develop and highly effective for learners.

This design template is one of the easiest to develop, requiring the setup of a minimal number of slides. A short and compact training course can be created using the set of slides described below.

- Home page
 - FBI Screen
 - Course Resources
 - Course Help
 - Course Glossary
- Lesson 1 Announcement
 - Lesson 1 Carousel
 - 1 – 6 content display elements
 - Lesson 1 Knowledge Checks
- Course Summary

More Complex Carousel Template Design

Taking the template to the next level, additional carousel content slides can be added to a single lesson. Possibly add knowledge checks between carousel content slides to create larger lesson structures.

This template is scalable and presents information using easy to use and understand presentation methods.
